

ABOUT STEVE STRITZL

Steve has over 20 years experience in the production and management assistance for federal, state, municipal, and private land development projects in the Northeast and Mid-Atlantic region including: Analyzing site conditions, working with clients and municipalities to develop program elements, feasibility and concept design studies, to moving forward with preparation of construction documents, while coordinating with design team consultants, to the final phase of construction implementation and management. Work experience includes site planning and design for various federal military projects, University and K-12 school sites, municipal design of parks, recreation & athletic facilities; commercial and corporate centers, and multi-family & single family residential landscape master planning and construction document preparation. He is also responsible for managing and overseeing the projects of other employees, ensuring the highest quality of work, coordination with various trades and suppliers, meeting deadlines, making decisions about site planning and engineering methods, problem solving, and representing the firm in conferences and presentations with clients, government officials, architects, engineers and contractors.
